# Solar cloth glass

## Overview

---

Who is solar cloth?

I founded Solar Cloth in 2014 with this awareness. It has become a shared mind-set among my business partners, coworkers, friends and passionate clients. Together we have designed a high quality photovoltaic textile: lightweight, foldable, furlable, and 'Made in France'.

What is a solar cell cover glass?

Our Solar Cell Cover Glasses offer a range of technical advantages when used for space or terrestrial applications such as photovoltaic systems and optical solar reflectors. Transmittance across the spectrum from UV-A to near-infrared is excellent, while low-wavelength UV radiation is effectively blocked.

What is photovoltaic smart glass?

Photovoltaic glass, also known as solar glass or transparent solar panels, is a type of smart glass that uses embedded photovoltaic cells to convert sunlight into electricity to generate electricity.

What is solar fabric?

**Solar Fabric: Redefining Renewable Energy With Innovative Solar Textiles !**  
Solar Fabric is poised to change the face of wearable electronics. Imagine keeping your smartphone charged, or tracking your fitness and activity levels, just by wearing a certain textile — and without having to carry along a charger cord.
