

# **Solar container lithium battery pack in Nassau**

## Overview

---

What is battery energy storage system (CESS)?

CESS is an important Lithium Battery technology that can help to improve energy efficiency, promote sustainability, and increase energy resilience. How exactly does Battery Energy Storage System work?

Battery Energy Storage System works by storing electricity in lithium-ion batteries that are housed inside a container.

What is container energy storage system (CESS)?

Container Energy Storage System (CESS) is a modular and scalable energy storage solution that utilizes containerized lithium-ion batteries to store and supply electricity. These containers are designed to be easily transportable and can be installed in various locations depending on the energy needs of the user.

What is battery energy storage system?

Battery Energy Storage System is very large batteries can store electricity from solar until it is needed, and can be paired with software that controls the charge and discharge.

What is a microgreen containerized energy storage solution?

The core technology used in Microgreen containerized energy storage solutions are top quality Lithium Ferrous Phosphate (LFP) cells from CATL. CATL's 280Ah LiFePO4 (LFP) cell is the safest and most stable chemistry among all types of lithium ion batteries, while achieving 6,000 charging cycles or more. CATL serves global automotive OEMs.
