# **Solar container outdoor power with lighting**

## Overview

---

What is shipping container solar lighting?

Shipping container solar lighting will be your best solution. No cords to worry about and no worry about loosing power. The shipping container solar lighting system is very simple and maintenance free. The 12V battery provide power to the LED lights and the solar panel provide power to the battery through the charging controller.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

How do shipping container lights work?

They are mounted on the twist-tight lock with magnets to provide external lighting around the Shipping Container. We also offer vapor-tight and explosion-proof LED container lights and LED Floodlights. Shipping containers are not very large spaces with relatively low ceiling heights.
