

# **Solar container prices in the Philippines**

## Overview

---

How much do solar panels cost in the Philippines?

Prices can fluctuate based on these trends. For example, the recent decrease in the cost of solar panel production has contributed to lower consumer prices. As of recent data, solar panel prices in the Philippines typically range from PHP 30,000 to PHP 60,000 per kilowatt (kW). This cost includes panels, inverters, and installation.

Where to buy cheap solar panels in the Philippines?

The cheapest offers of solar panels in the Philippines can usually be found in online stores or solar equipment distributors. There we can find opportunities for panels from lesser-known brands at promotional prices. However, when buying a very cheap panel, you should be careful about unfair offers and contraband.

Are solar panels a good investment in the Philippines?

Yes, investing in solar panels is a good idea in the Philippines. With the right system, our clients experience 30% to 70% savings on their electricity bills, with some even reaching a zero bill. The payback period for a solar system in the Philippines is typically between 3 to 5 years, after which the savings go straight to your pocket.

Is solar energy a viable solution in the Philippines?

Solar energy has proven to be a viable and economical solution in the Philippine market. Whether you're looking to save ₱3,000 a month on electricity or power your entire business sustainably, solar is a practical choice. Let's break down the costs of a solar energy system in the Philippines in 2025.
