

# Solar lights for business use

## Overview

---

Are commercial outdoor solar lights a good choice?

Get off to a bright start with commercial outdoor solar lights from Greenshine. When it comes to outdoor commercial solar lights, solar LED lights are your #1 option. Commercial outdoor solar street lights are a perfect combination of environmentally friendly, green technology paired with energy-efficient LED fixtures for maximum cost-effectiveness.

How can commercial solar help your business?

Commercial solar systems from Hoymiles can help your business save money, improve the reliability of your energy supply, and reduce your carbon footprint. Hoymiles offers a wide selection of commercial solar products to help businesses start benefiting from solar energy. Get in touch today to learn more about our commercial solar solutions and how they could benefit you.

What are solar lights used for?

**Spotlights:** These solar lights are used for lighting up a single area or highlighting trees and shrubs. They also double as security lights, as they're good for dark spots that could use brief bursts of bright light, like the front of sheds when you're locking or unlocking a door, or alleyways when you're putting the bins out.

Why is solar lighting better than traditional lighting?

A commercial-grade lighting solution that uses solar power to energize LED lights is superior to traditional lighting for several reasons. Eliminate costly energy bills, avoid potential lot destruction and "go green" with hi-tech, low footprint parking lot lights. Light your pathway with our energy-saving commercial solar lighting.
