Overview

What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

What happened to solar energy investment in 2024?

BNEF finds that utility-scale solar photovoltaic investment was particularly hit, falling 19% compared to the first half of 2024.

What is SP's largest solar project in China?

This is SP's largest solar photovoltaic (PV) project investment in China, integrating clean energy with agriculture. Located in Huidong County, this is also the largest centralised solar project currently connected to the grid in Guangdong and is scheduled to be fully operational by the end of 2024.

How many solar projects are there?

There are more than 8,100 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,300 major energy storage projects currently in the database, representing more than 104,000 MWh of capacity. The list shows that there are more than 180 GWdc of major solar projects currently operating.
