

# Solar panel money

## Overview

---

How much money can you save with solar panels?

Most homeowners save around \$50,000 over 25 years. Solar panels require an upfront investment but provide significant savings on energy bills over time. Depending on your area's electricity costs, you could save between \$37,000 and \$148,000 over 25 years with solar panels.

Do solar panels save money on electricity bills?

The amount of money that you save on your electricity bills when you install solar panels depends on the size of the solar power system you install. Larger systems are able to collect more sunlight, thereby increasing the amount of electricity they produce.

How much do solar panels cost?

Solar panels: The solar panels alone can cost between 80 cents to \$1.80 per watt, depending on the type, size and application. That's not including the cost of installation and of all the other equipment needed to get them producing energy and powering your home.

Are solar panels a good investment?

Solar panels require an upfront investment but provide significant savings on energy bills over time. Depending on your area's electricity costs, you could save between \$37,000 and \$148,000 over 25 years with solar panels. The higher your local electricity prices, the greater your potential for solar savings.
