

# Solar panel size customization

## Overview

---

How much does it cost to design a custom solar panel?

There are no design fees to create a prototype of your custom solar panel. Some, but not most, designs may require a fee to prepare the machinery to create your specific panel at volume. Our MOQ is 500 - 2,000 units depending on the size of the panel.

Can I get a solar panel in a custom shape?

Yes, it is possible to get a solar panel in a custom shape. At Voltaic, we manufacture both standard and custom small solar panels, with most being rectangular, but we have experience designing and deploying a full range of interesting shapes and sizes.

Should I start a solar project with small Solar panels?

Prototype your project with small solar panels before moving forward with custom designs. This allows you to confirm the efficiency of the circuit and power production estimates before investing in a custom design.

How can a small solar panel save you money?

For example, if you can reduce your circuit's mA requirements by 50% this reduces the size of the solar panel by 50%, saving you money, size, and weight. Prototype your project with small solar panels before moving forward with custom designs.
