Solar panel transportation and installation equipment manufacturers

Overview

Who needs transport services for solar power plant assembly?

Find out about our international transport services for all kinds of equipment involved in solar power plant assembly. The main customers we work with are component manufacturers, EPC (Engineering, Procurement and Construction) firms and power plant owners or park developers who need transport services.

How does solar energy logistics work?

Using our global network of air and sea carriers, we design a solar energy logistics solution that transports your solar panels or solar panel components efficiently and safely to their destination.

Which countries do solar power companies export components to?

They export components for building solar parks mainly to Spain and Latin American countries such as: Chile. Colombia. Peru. Ecuador. Dominican Republic. Our division specialised in logistics for the solar power industry delivers international logistics and transport services for any component needed in the assembly of a solar power plant.

What is solar vertical logistics?

Our solar vertical logistics team is also specialised in breakbulk cargo shipping for tracker components such as tubes and piles. We additionally deliver logistics services for items including inverters and transformer substations that are heavy, oversized or out-of-gauge which means a conventional container is not an option.
