

Solar panels power generation in Egypt

Overview

Is there enough attention to solar energy in Egypt?

“There is not enough attention paid to the segment below 500 MW,” claims Khaled Gassar, chairman and cofounder of the Solar Energy Development Association (SEDA), an NGO that seeks to develop the solar energy market in Egypt.

How does solar energy work in Egypt?

Solar photovoltaic (PV) energy or PV solar energy directly converts sunlight into electricity, using a technology based on the photovoltaic effect. The Egyptian solar PV market is segmented by deployment. By deployment, the market is segmented into on-grid and off-grid.

Does Egypt have a solar energy grid?

Egypt connected a large solar energy capacity to the grid over the past few years. Most of this capacity is from large-scale ground-mounted projects. However, several grid-connected small-scale solar system projects are also connected to the grid.

Where can solar power be developed in Egypt?

Utility-scale PV development has, thus far, clustered around Aswan in the south of the country, where solar resources are strongest and there is plenty of land for development. The biggest chunk of Egyptian solar capacity is provided by the Benban project, which lies 50 km from Aswan and is one of the world’s biggest PV sites.
