Solar panels removed in Zurich Switzerland

Overview

Do solar panels pay off in Switzerland?

Installing solar panels on a multi-family home with nine residents spread across four apartments and a heat pump pays off in almost all Swiss cities and communes. The median lies at a return of 10.5 percent. On average, 63 percent of the solar power generated is consumed at home.

Does Switzerland need solar power?

Many power grid operators pay too little, thereby limiting the expansion of solar power. To reach its climate goals, Switzerland needs to massively increase its solar energy production. Photovoltaic panels on single- and multi-family homes play an important role in this regard as they represent 42 percent of potential roof space.

How much does solar power cost in Switzerland?

Depending on the electricity supplier, homeowners in Switzerland in 2022 received between 5 and 22 Swiss cents per kilowatt hour for solar power generated at home. They paid between 12 and 34 Swiss cents per kilowatt hour of electricity.

Can solar panels be installed in Switzerland?

Typically, solar panels in Switzerland are mounted on existing infrastructure like mountain huts, ski lifts, and dams, with larger-scale installations in the Alps remaining rare. On September 10, 2023, 54% of Valais voters rejected Alpine solar project proposals due to environmental and aesthetic concerns.
