Solar sun room glass selection

Overview

What is the best glass for a sunroom?

For many homeowners, a window is just a window, but the glass will actually dictate the performance, feel and allure of the sunroom. Because traditional sunrooms utilize Stanek® Windows, triple-pane, low-e, high-performance glass comes standard and is among the most energy-efficient window glass on the market.

Does window glass reduce solar heat?

Fortunately, there are window glass products that can help protect your home while allowing natural light to enter. There is one key factor that affects a window's ability to reduce the amount of solar heat inside the home: the glass composition.

What is solar control glass?

Solar control glass products for the home specialize in reducing the risk of interiors overheating, while allowing you to retain clear views. The glass composition is the key factor to reduce the possibility of color fade on curtains, furniture and other material.

How do I stop the Sun from discoloring my home?

You can use curtains, blinds or awnings to stop the sun's light from causing high interior temperatures. They will also help prevent the sun's UV rays from discoloring interiors. These efforts, however, will change the appearance of your home and eliminate views to the outside.
