## Solar tiles bipv

## Overview

---

Where can metsolar BIPV solutions be used?

Metsolar BIPV solutions for roofing and solar roof tile projects are already successfully implemented and generating energy across Europe in Scandinavia region, Middle East and North America. Our flexible manufacturing allows us to deliver visually appealing and cost & energy efficient roofing solutions.

What are solar roof tiles?

Solar panels are designed more and more with their architectural integration in mind. Solar roof tiles are a perfect solution, since they constitute a range of active technological glasses that have the property of generating electrical energy and can be used both in newly built buildings and in renovations.

Which glass is used for BIPV solar panels?

To achieve most ergonomic look, most often satin solar glass for such BIPV modules are used. We manufacture extensive variety of custom BIPV solar panels in size, shape, color, transparency and efficiency. All our PV products can be produced with full or cut solar cells as per demand.

Can photovoltaic roof tiles save energy?

The architectural integration of photovoltaic roof tiles in construction makes it possible to create glazed surfaces that, in addition to being an aesthetic and functional novelty, generate electricity, improving the thermal and acoustic insulation of buildings, also allowing control solar and electrical autonomy with the consequent energy savings.
