

# Spanish energy storage solar container lithium battery

## Overview

---

What is energy storage in Spain?

It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms.

How will Spain increase its energy storage capacity?

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

Why should Spain invest in energy storage?

Investing in energy storage helps Spain meet its climate goals. This includes achieving carbon neutrality by 2050. Storing renewable energy instead of wasting it helps the country rely less on fossil fuels. This also cuts down greenhouse gas emissions. Pumped hydro, thermal storage, and battery systems are effective technologies.

What is Erasmo solar PV Park - Battery energy storage system?

The Erasmo Solar PV park - Battery Energy Storage System is a 80,000kW lithium-ion battery energy storage project located in Saceruela, Castile-La Mancha, Spain. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2021 and will be commissioned in 2024.

## Spanish energy storage solar container lithium battery
