

# St John s Energy Storage Project

## Overview

---

How will a battery system help Saint John energy?

The battery system may also help Saint John Energy provide power to customers during power outages due to storm events. The project will support a greener grid in New Brunswick and reduce greenhouse gas emissions, while supporting an equitable transition to an electrified economy.

Is Saint John energy the first to deploy a Tesla Megapack?

Proud to be the first in the world to deploy. Energy storage is a critical element of our green energy future, and we are thinking big on this front. In 2019, Saint John Energy was proud to be the first in the world to deploy a Tesla Megapack.

What is the largest battery project in New Brunswick?

The battery project is the largest battery in New Brunswick. It consists of a 5.8 megawatt / 11.6 megawatt-hour lithium-ion battery that can deliver 5.8 megawatts of energy to the Saint John Energy grid for a two-hour period on a full charge.

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.
