# Sukhumi solar Curtain Wall

## Overview

---

What is photovoltaic curtain wall?

Introduction: Photovoltaic Curtain Wall refers to a new type of building exterior wall system that combines solar photovoltaic power generation technology with building curtain walls.

How does a solar curtain wall work?

This system integrates photovoltaic components (such as solar panels) into the building curtain wall so that the curtain wall not only has traditional enclosure, decoration, and insulation functions but also can convert solar energy into electrical energy, providing green and clean energy for the building. Features 1.

What is a PV curtain wall?

The PV curtain wall is the most typical one in the integrated application of PV building. It combines PV power generation technology with curtain wall technology, which uses special resin materials to insert solar cells between glass materials and convert solar energy into electricity through the panels for use by enterprises.

Can photovoltaic curtain wall array be used in building complexes?

Xiong et al. [ 31] develops a power model for Photovoltaic Curtain Wall Array (PVCWA) systems in building complexes and identifies optimal configurations for mitigating shading effects, providing valuable insights for the application of PVCWA systems in buildings.
