

# Swedish lithium energy storage power production

## Overview

---

What is the largest energy storage investment in the Nordics?

It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid. Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling increased power production.

How many large battery storage systems are deploying in Sweden?

Fourteen large battery storage systems (BESS) have come online in Sweden, deploying 211 MW/211 MWh for the region. Developer and optimiser Ingrid Capacity and storage owner-operator BW ESS have been working together to deliver 14 large BESS projects across the Swedish grid in tariff zones SE3 and SE4.

What is Sweden's largest energy storage investment?

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region.

Does Sweden need more energy?

“ Sweden is facing a significantly increased demand for electricity, which must be addressed through a combination of increased fossil-free electricity production, stronger power grids and improved energy storage. It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid.
