

Syria s 5 5 billion energy storage project

Overview

How much energy has been lost in Syria?

Meanwhile, 80 per cent of energy capacity has been lost. Syria generated around 9,000 megawatts in 2010 which has dropped to less than 1,500 megawatts today. Seventy per cent of power plants have been damaged and 75 per cent of national grid capacity has been lost.

Will Syria's electricity woes slacken?

Damascus, Syria - With electricity only available a few hours a day, there is little relief from the sweltering heat these days in Damascus. But US President Donald Trump's decision to lift long-standing sanctions on Syria in May, and a rash of recent energy deals, are triggering optimism that Syria's electricity woes may soon begin to slacken.

Will Qatar double Syria's energy capacity?

Meanwhile, in late May, the new government signed a deal worth \$7 billion with an international energy consortium led by Qatar's UCC holdings, promising to double Syria's energy capacity over the next three years.

How much will a collapsed electricity grid cost Syria?

According to Ghassan al-Zamel, former Minister of Electricity under the Assad regime, speaking in 2024, the combined direct and indirect costs of Syria's collapsed energy grid could amount to \$120 billion over 12 years. "Syria can never become a destination for inward investment without electricity," argues Hobhouse.
