Temporary power mobile box connected to secondary power supply

Overview

What is Langsung mobile temporary power supply?

Langsung's Mobile Temporary Power Supply Device offers safe, efficient, and standardized power access for construction projects. Features 10.5kV voltage, up to 315kVA capacity, IP33 protection, and weather resistance. Reusable, hoistable, and seasonally independent—reduces project cost by up to 40%. Trusted by construction firms globally.

What is a mobile temporary power supply device?

The Mobile Temporary Power Supply Device features a fully enclosed structure with a high protection rating, ensuring reliable safety. It comes with a built-in base, making installation convenient and unaffected by seasonal changes, allowing construction even in winter.

What is a mobile substation?

Mobile substations are a type of power distribution system that can be transported and installed quickly and easily in different locations. They are used to provide temporary or emergency power supply to areas where the grid is unavailable or has been damaged, such as construction sites, disaster zones, remote areas, or events.

What is a temporary power supply connection?

A temporary power supply connection is a provisional electrical setup designed to provide power for a limited period. It is typically required in situations where permanent power infrastructure has not yet been established or is temporarily unavailable.
