# The factory built its own solar energy storage

## Overview

---

What is Tesla's first energy storage facility outside the US?

First Energy Storage Facility Outside the U.S. The Shanghai Megafactory will mark a pivotal step for Tesla as its first energy storage production site outside of the United States. This venture highlights the company's strategy to extend its influence and capabilities beyond traditional automotive manufacturing.

Will Tesla's Shanghai energy storage megafactory expand?

At the launching ceremony, Mike Snyder, Tesla's vice president of energy and charging, noted that Tesla's Shanghai energy storage Megafactory is scheduled to ramp up production this quarter, which will assist Tesla to expand into more markets. "We've witnessed the incredible speed of Shanghai and Tesla once again.

Why is Tesla launching a battery factory in China?

The battery factory marks the company's first energy storage system factory outside the US to manufacture its energy storage batteries known as Megapacks, and is also another major investment for Tesla in China following the inauguration of its Shanghai Gigafactory in 2019.

What is the future of energy storage?

The mass production of these units is expected to start next year with an initial output of 10,000 units annually, equal to around 40 GWh of energy storage. The future of renewable energy relies on large-scale energy storage. The Shanghai Megafactory, Tesla's first energy storage facility outside the US, covers approximately 200,000 square meters.
