

# **The largest lithium iron phosphate solar container battery**

## Overview

---

A 500 MW/2,000 MWh lithium iron phosphate battery energy storage system has entered commercial operation in Tongliao, Inner Mongolia, after five months of construction, with total investment of CNY 1.5 billion (\$212.2 million) and designed for peak shaving and renewable integration. Where is a 200mw/400mwh battery energy storage system located?

The 200MW/400MWh BESS project in Ningxia, China. Image: Hithium Energy Storage. A 200MW/400MWh battery energy storage system (BESS) has gone live in Ningxia, China, equipped with Hithium lithium iron phosphate (LFP) cells.

Which country makes the most lithium batteries?

As well as being the world's manufacturing centre for batteries, China is also the country most involved in the entire lithium battery value chain, as highlighted and analysed recently by BloombergNEF. Downstream, the country is targeting 30GW of non-hydroelectric energy storage deployment by 2025, and 120GW of new pumped hydro by 2030.

How much does a LiFePO<sub>4</sub> battery weigh?

The company says its newest product uses 700-Ah lithium iron phosphate (LiFePO<sub>4</sub>) cells in a liquid-cooled 1,500 to 2,000-volt configuration that's good for nearly 16,000 charge cycles that all fits in half a normal shipping container. All in, the system weighs about 55 tons (50 tonnes).

Will Envision Energy's 8 MWh battery fit in a 20 ft 6 m shipping container?

Envision Energy announced an 8-MWh, grid-scale battery that fits in a 20-ft (6-m) shipping container this week while at the third Electrical Energy Storage Alliance (EESA) exhibition held in Shanghai. Taken from Envision Energy's website, this is a possible design configuration of its 8-MWh, 20-ft (6-m) container battery. It's colossal.
