# The price of a solar panel per watt

Overview

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under $29,000 or $2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent $100,000 going solar. Dion in Nevada said their 10-kW system cost about $20,000, which is about the national average price for a 7-kW system.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is $2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

Why do solar panels cost more than a Watt?

For instance, commercial installations or large residential systems can negotiate better pricing due to the volume of panels purchased. Conversely, smaller installations may face higher costs per watt because the fixed costs associated with installation, such as labor and permitting, are spread over fewer panels.

What is the cost per watt?

By analyzing the cost per watt, homeowners and businesses can make informed decisions that align with their financial goals and energy needs. To begin with, the cost per watt is a fundamental metric that reflects the price of solar panels divided by their total output capacity in watts.
