

# **UK Mobile Energy Storage Container Earthquake Resistant Type**

## Overview

---

What is energy storage container?

Energy Storage Container is an energy storage battery system, which includes a monitoring system, battery management unit, particular fire protection system, special air conditioner, energy storage converter, and isolation transformer developed for the needs of the mobile energy storage market.

What is a 10ft energy storage system?

These energy storage systems come in a 10ft container. Designed to meet the requirements for off- and on-grid applications, they are ideal in combination with renewable stations, providing up to 9,2 MWh of storage capacity —with 16 ZBC 250-575 units connected in parallel.

What is a stand-alone energy storage system?

Stand-alone medium energy storage systems offer no fuel consumption and no CO<sub>2</sub> emissions during their operation. This scenario is also common for microgrids with a backup generator, in which the energy storage system is managing the input coming from the grid and/or renewable sources of energy.

What is a medium energy storage system?

Delivering at less than 80 dB (A), these medium energy storage systems are suitable for noise-sensitive environments, such as events and construction sites in metropolitan areas, as well as for telecom, manufacturing, mining, oil and gas and rental applications.
