

# UPS battery cabinet installation in parallel

## Overview

---

Ground each UPS in a parallel system separately, and connect power cables and battery cables. Select a parallel mode and connect cables to the parallel system based on site requirements. How to install UPS & battery cabinet?

1. Installation sequence is as follows: 1.1 First, determine the installation location of the UPS and battery cabinet upon arrival at the site. 1.2. Install the battery connection Wires.

How do I install a parallel ups cabinet?

Use a forklift or pallet jack to move the packaged cabinet to the installation site, or as close as possible to the site, before unloading from the pallet. Prepare the site for the cabinet installation. Inspect, unpack, and unload the cabinet. Create an installation plan for wiring the parallel cabinet to the corresponding UPS modules.

Can a parallel redundant system use a separate battery cabinet?

There are two possible configurations for battery connection of the parallel redundant system. The two UPS modules may share the same battery cabinet(s), or each module may use a separate battery cabinet(s). Figure 7 shows a diagram of the parallel redundant system with UPS modules utilizing separate battery cabinets.

How do I install a parallel UPS system?

All you need is two or more compatible UPS modules and an electromechanical tie cabinet that connects the output of those UPS modules together. No special circuitry or software is required in the UPSs themselves. That means existing UPSs in the field can become part of a parallel system without retrofitting or replacement.
