

Uninterruptible power supply battery cabinet

Overview

How do uninterruptible power supplies work?

Uninterruptible power supplies (UPS) automatically test their batteries regularly, typically every 24 hours, by placing a load on the battery set and monitoring the discharge performance. This is how they work.

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.
