Is upward lighting a good brand?

In addition, Upward Lighting's commitment to quality and reliability has established them as a trusted and sought-after brand in the solar lighting industry in China and globally. Solar street lights have evolved significantly in recent years, offering various design, shape, and functionality options.

What is upward lighting in photography?

Upward lighting is the final, and rarest, form of directional lighting in photography. As the name suggests, upward lighting comes from underneath your subject, and will upward-moving shadows. The classic example of upward lighting is from Halloween photos, where a child lights their face using a flashlight held under the chin.
