Overview

Why do Venezuelans need electricity?

Urgent humanitarian needs and the demands of Venezuelan citizens call for the restoration of electricity supplies as fast as possible, but also with a modern system that ensures low electricity prices that enable competition and economic growth. P. M. De Oliveira-De Jesus: Conceptualization, Writing and proofreading.

Why does Venezuela have a poor electricity system?

Since 2008 or even before, likely up to now, Venezuela has had an electric system in critical condition that is not able to satisfy the electricity demand, which has fallen because of the severe economic crisis, and offers very low-quality services.

How has Venezuela impacted the energy sector?

Since 2013, Venezuela has been confronting a profound political, social, and economic crisis with a strong negative impact on the country's energy sector. The crisis has severely affected the production of oil, natural gas, fuels, and electricity (Monaldi et al., 2021).

What are the statistics on electricity production in Venezuela?

Since 2009, there have been no official statistics on the electricity and energy sectors. Since the end of the 19th century, the production of electricity has been steadily growing in Venezuela. In between, there were some jolts due to prolonged droughts associated with the El Niño phenomenon.
