

Victoria Energy Storage Inverter

Overview

Will FRV deliver a battery energy storage system at Gnarwarre?

FRV will deliver a 250MW / 500MWh Battery Energy Storage System (BESS) at Gnarwarre, Victoria that will be commissioned with grid-forming functionality enabled.

Is koorangie battery energy storage fully operational?

The 185 MW / 370 MWh Koorangie battery energy storage project in northwest Victoria has reached a major milestone with developer Edify Energy confirming the system, featuring grid-forming inverters, is now fully operational.

How can private sector investments improve Australia's energy infrastructure?

Additionally, private sector investments, such as Energy Vault's agreement to supply a 100 MW / 200 MWh battery energy storage system for Victoria's State Electricity Commission Renewable Energy Park, further underscore the collaborative efforts to enhance Australia's energy infrastructure.

Will grid-forming inverters replace fossil-fuel generators?

"The grid-forming inverters will allow the battery to replace the type of system strength services that were once only provided by fossil-fuel generators." The Koorangie facility is one of 12 projects funded through the Victorian government's Renewable Energy Zone Fund, an initiative to strengthen and modernise the state's energy grid.
