# Welcoming full energy storage projects

## Overview

---

Is pumped storage the future of energy storage?

Though pumped storage is predominant in energy storage projects, a range of new storage technologies, such as electrochemical, are rapidly gaining momentum.

What is a battery energy storage system (BESS) project?

A Battery Energy Storage System (BESS) project is an energy storage technology that uses rechargeable batteries to store electrical energy from various sources and release it when needed, functioning like a large-scale rechargeable battery that stabilizes the grid and enables renewable energy integration. Which is the largest BESS project in India?

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

How many energy storage projects are there in the world?

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications.
