

# **What are the explosion-proof systems of energy storage cabinets**

## Overview

---

What is a battery energy storage system (BESS)?

BESS (Battery Energy Storage Systems) are designed to protect systems (BESS) from explosions and fires. We also can customize power applications. BESS market : Battery Energy Storage Systems (BESS) have become, in a few years, an unparalleled solution to remedy the intermittency of certain renewable energies, such as wind and solar.

What is a battery energy storage system?

Battery Energy Storage Systems (BESS) represent a significant component supporting the shift towards a more sustainable and green energy future for the planet. BESS units can be employed in a variety of situations, ranging from temporary, standby and off-grid applications to larger, fixed installations.

What causes fire & explosion inside a BESS enclosure?

The leading cause of fire and explosion inside a BESS enclosure is the release and ignition of combustible vapors from an overheating battery.

Does NFPA 855 require explosion control?

NFPA 855 [\*footnote 1], the Standard for the Installation of Stationary Energy Storage Systems, calls for explosion control in the form of either explosion prevention in accordance with NFPA 69 [\*footnote 2] or deflagration venting in accordance with NFPA 68 [\*footnote 3].
