How does Massachusetts use offshore wind energy?

Learn about Massachusetts efforts to responsibly site and develop offshore wind. Offshore wind energy technology uses wind turbines located in ocean waters to generate electricity from wind energy. Electricity is then transmitted via cables to the mainland electricity grid.

Where are offshore wind projects located in Massachusetts?

This map shows the location of offshore wind projects south of Martha's Vineyard and Nantucket in Massachusetts. SouthCoast Wind received federal approval on Friday, Jan. 17, 2025. (Bureau of Ocean Energy Management).

Will Southcoast wind power 840,000 homes?

"We are proud to announce [Bureau of Ocean Energy Management's] final approval of the SouthCoast Wind project, the nation's eleventh commercial-scale offshore wind energy project, which will power more than 840,000 homes," Elizabeth Klein, director of BOEM, said in a statement.

How many megawatts does Southcoast wind have?

In September, Massachusetts selected 1,087 megawatts of power from the 1,287 megawatt SouthCoast Wind project, with the remaining 200 megawatts going to Rhode Island.
