# When will Swedish Communications deploy 5G base stations

## Overview

---

Does Sweden have 5G?

5G deployment is underway in Sweden. In October 2023, 92% of the population had coverage from 5G networks. The government has not imposed any requirements on operators regarding the deployment of 5G, but there are coverage requirements in various frequency bands in order to improve mobile coverage in Sweden.

Where is the 6g network being installed in Sweden?

The 6G network is currently being installed in the underground lab at Luleå University of Technology. Are you looking for information on 5G regulation and law in Sweden?

This CMS Expert Guide provides you with everything you need to know.

How many mobile base stations will be equipped with 4G & 5G?

During 2025, approximately 50 mobile base stations, both new and existing, will be equipped with 4G and 5G networks. By 2030, Telia is aiming for uninterrupted connectivity along all railway routes in Sweden.

Can 5G modernize the communication standard for Swedish trains?

Staffan Åkesson, Technical Director for Telia Sweden, says: "Thanks to our leading 5G coverage and its unique technical capabilities, we can modernize the critical communication standard for Swedish trains. Given the central role of trains in the transition to a more sustainable transport system, this seems particularly urgent.
