

# Which BESS power station is the best in Poland

## Overview

---

Is Poland moving towards battery energy storage systems (BESS)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

Why is Poland a leader in energy storage technology?

Poland's regulatory environment is increasingly supportive of BESS investments, with new policies offering tax incentives and subsidies. The alignment with European Union energy directives further propels the adoption of renewable energy and energy storage solutions, positioning Poland as a leader in energy storage technology within the region.

What role does BESS play in Poland's energy transformation?

This transition requires effective storage solutions to manage the intermittency of renewable sources like wind and solar. The state's investment of approximately \$4.7 billion in battery storage projects underscores the critical role of BESS in Poland's energy transformation. Geographical Distribution and Strategic Focus Areas

## Which BESS power station is the best in Poland

---

BYD to supply 1.6 GWh of battery storage for Greenvolt in ...

Mar 4, 2025 · Greenvolt Power, a subsidiary of Portugal's Greenvolt Group, signed an agreement on March 3 with China's BYD Energy Storage to develop two battery energy storage system ...
