

# **Which UPS is recommended in Sanaa**

## Overview

---

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.

What is an uninterruptible power supply (UPS)?

A solid Uninterruptible Power Supply (UPS) can be a real lifesaver, keeping everything running smoothly when the lights go out. We've done some digging into the top picks, backed by data and expert review.

How to choose a suitable UPS system?

Before selecting a suitable UPS system, you should calculate the power requirements of all connected devices. The output power of the selected UPS should be 20 - 25 % higher than the total power consumption of the connected systems. The more systems connected to the UPS, the shorter the bridging time.

Which APC ups are best for home use?

This is another great UPS from APC, and with the BE600M1, the company has created a UPS device that is ideal for home use. That's thanks to its small and unobtrusive design, and it offers enough power for smaller devices, such as home NAS drives, routers, and gaming consoles.
