

Which companies are there in Reykjavik Power Station

Overview

Who produces electricity in Iceland?

There are three main electricity producers: Landsvirkjun, which is state-owned; Reykjavík Energy, owned by three municipalities; and HS Energy, owned by local municipalities and private investors, some of whom are foreign. There is a nascent wind power sector and some interest in developing solar power, especially for off-grid uses.

How many power stations are there in Iceland?

We operate fourteen hydropower stations, three geothermal power stations and two wind turbines for research purposes in five operating areas in Iceland. In operating power stations, emphasis is placed on a holistic vision, where prudence, reliability and harmony of the operations with environment and society are the guiding principles.

Who are the customers of Reykjavik fibre network?

The customers of the Reykjavik Fibre Network, which owns and runs a fibre optics company called Ljósleiðarinn, include both businesses and households in Reykjavik Energy's utility areas. Through agreements with the owners of Reykjavik Energy, the company takes on the statutory municipal function of developing and running the sewerage systems.

When did the Reykjavik Electricity Authority start?

The operation of the Reykjavik Electricity Authority began formally in 1921, when a hydroelectric power station was inaugurated on the Ellida river. The distribution system was enlarged to keep pace with the rapid increase in the population of the capital during the 1920's and soon the Ellida station cope with the demand.
