Which is China Electronics Technology Group's 5g industrial base station

Overview

How many 5G base stations are there in China?

(Xinhua/Zhang Yuwei) BEIJING, April 18 (Xinhua) -- The number of 5G base stations in China has topped over 4.39 million by the end of March, with the user penetration rate reaching 75.9 percent, the Ministry of Industry and Information Technology (MIIT) said on Friday.

What is a 5G industrial base station?

With a computing board added to the traditional base station, it provides functions such as precise clock synchronization, enhanced connection capabilities, deterministic delay guarantee, and support for centralized and cloud-based PLC. In addition to traditional base station functions, 5G industrial base stations offer four key features:.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

Can 5G be used in industrial production lines?

This solution, based on the basic network connections of the traditional base stations, provides enhanced assurance of deterministic connection capabilities, making it possible for 5G to penetrate into the operational technology (OT) domain of the industrial production line.
