

Which manufacturer is the 21700 battery cell 02k

Overview

Who makes 21700 battery cells?

In the research and production of 21700 battery cells, BAK Battery has consistently maintained an advanced layout and technological leadership. They continuously break through the capacity ceiling of 21700 battery cells, successively releasing and mass-producing 21700-5.0Ah and 21700-5.3Ah battery cell products.

What is a 21700 battery?

The 21700 battery is a cylindrical lithium-ion battery with a diameter of 21mm and a length of 70mm. It offers a nominal voltage of 3.7V and a capacity of up to 5,000mAh, making it a powerful and efficient energy source. Its energy density ranges between 250 Wh/kg and 300 Wh/kg, depending on the chemistry.

Are 21700 battery cells a good choice?

In the past two years, 21700 battery cells have gained widespread use in the small power market due to their higher energy density and overall cost advantages compared to traditional 18650 cells.

How much does a 21700 cell weigh?

The 21700 cell weighs approximately 60–70 grams, depending on the manufacturer and specific chemistry. While slightly heavier than the 18650 cell, this weight increase is justified by its higher capacity and energy density.
