What are inverters & uninterruptible power supplies (UPS)?

Inverters and Uninterruptible Power Supplies (UPS) are key elements in power system infrastructure. An inverter is a device that converts direct current (DC) to alternating current (AC), enabling the use of electrical appliances when main power is unavailable, such as in solar power systems or mobile applications.

What is an inverter system?

Inverter Systems Harness efficient and reliable AC power with our versatile range of Inverters. Essential for converting DC (Direct Current) power—typically stored in batteries or generated by solar panels—into usable AC (Alternating Current) power, inverters are the core component of any backup or off-grid energy system.
