What is a new shipping container?

A “new” shipping container is one that has made the journey from China to the UK only once. New shipping containers are in high demand for either shipping or storage purposes. The fact that they have only been used once means that they are still in very good condition and can be used for a variety of purposes.

What is a 10 ft container?

This container type is designed to cater for the storage of different goods in the same container by having doors at both ends. A 10ft container is perfect the size because it's a versatile, sturdy, and cost-effective solution for a small office set up. Perfect for onsite security access or small home offices.

What are the different types of cargo containers?

Dry containers (DC) are the most used type of container in the world: 90% of goods shipped by sea are loaded in dry containers. The 20-foot and 40-foot cargo containers are made of steel and are suitable for all types of cargo. Refrigerated containers are used to transport goods requiring temperature-controlled conditions in transit.
